

Motor controllers CMMP-AS, for servo motors

FESTO

Festo core product range
Covers 80% of your automation tasks

Worldwide:

Always in stock

Superb:

Festo quality at an attractive price

Easy:

Reduces procurement and storing complexity

Ready for dispatch from the Festo factory in 24 hours
Held in stock in 13 service centres worldwide
More than 2200 products

Ready for dispatch in 5 days maximum from stock
Assembled for you in 4 service centres worldwide
Up to 6×10^{12} variants per product series

Motor controllers CMMP-AS, for servo motors

Key features

FESTO

Performance characteristics		
Compactness		Motion control
<ul style="list-style-type: none"> Extremely small dimensions Full integration of all components for the controller and power section, including USB interface, Ethernet and CANopen interface Integrated brake chopper 	<ul style="list-style-type: none"> Integrated EMC filters Automatic actuation for a holding brake Conforms to the current CE and EN standards without additional external measures (→ Page 6) 	<ul style="list-style-type: none"> Evaluation of digital absolute encoder (EnDat/HIPERFACE) in single-turn or multi-turn versions Can be operated as a torque, speed or position controller Integrated position control Time-optimised (trapezoidal) or jerk-free (S-shaped) positioning
Fieldbus interfaces		Input / Output
   	  	<ul style="list-style-type: none"> Freely programmable I/Os High-resolution 16-bit analogue input Jog/Teach mode Simple connection to a higher-order controller via I/O or fieldbus Synchronous operation Master/slave mode Additional I/Os with the plug-in card CAMC-D-8E8A → Page 18
Integrated safety functions		Integrated sequence control
<ul style="list-style-type: none"> Depending on the variant or plug-in card, the motor controller supports the following safety functions: <ul style="list-style-type: none"> Safe torque off (STO) Safe stop 1 (SS1) Safe brake control (SBC) 	<ul style="list-style-type: none"> Safe operating stop (SOS) Safe stop 2 (SS2) Safely limited speed (SLS) Safe speed range (SSR) Safe speed monitor (SSM) 	<ul style="list-style-type: none"> Automatic sequence of position sets without a higher-order controller Linear and cyclical position sequences Adjustable delay times Branches and wait positions Overlapping restart possible during the movement
		Interpolating multi-axis movement
		<ul style="list-style-type: none"> With a suitable controller, the CMMP-AS can perform path movements with interpolation via CANopen or EtherCAT. To do this, the controller specifies setpoint position values in a fixed time pattern. In between, the servo position controller independently interpolates the data values between two data points.

PROFIBUS®, PROFINET®, DeviceNet®, CANopen®, EtherCAT®, EtherNet/IP® is a registered trademark of its respective trademark holder in certain countries.

Motor controllers CMMP-AS, for servo motors

Key features

Travel program

- Linking of any number of position sets into a travel program
- Step enabling conditions for the travel program possible via digital inputs, for example
MC – motion complete
I/O – digital inputs

Library for EPLAN

→ www.festo.de/eplan

EPLAN macros for fast and reliable planning of electrical projects in combination with motor controllers,

motors and cables. This enables a high level of planning reliability, standardisation of

documentation, no need to create symbols, graphics and master data.

Cam disc functionality

The “electronic cam disc” application type creates optimised motion profiles that generate less vibration and lower acceleration forces at the machine. In addition, the movement of the motor is always synchronised with the position of a master axis so that overlapping, time-optimised motion sequences can be easily defined. To be able to use the cam disc function, you will need the Festo Configuration Tool (FCT) and also the curve editor → Page 21

Features:

- High system flexibility. The mechanics do not need to be modified if the requirements for the curve shapes change.
- User-friendly motion plan editor. All limits for position, speed and acceleration are immediately displayed in the editor.
- Up to 16 cam discs with a total of up to 2048 data points can be managed. The data points can be randomly distributed along the cam discs.
- Each cam disc is coupled with four digital trip cams.
- Each cam disc can be offset by a certain amount from the master axis.

Motor controllers CMMP-AS, for servo motors

Key features

FCT software – Festo Configuration Tool

Software platform for electric drives from Festo

- All drives in a system can be managed and saved in a common project
- Project and data management for all supported types of equipment
- Easy to use thanks to graphically supported parameter entry
- Universal mode of operation for all drives
- Work offline at your desk or online at the machine

FHPP – Festo Handling and Positioning Profile

Optimised data profile

Festo has developed an optimised data profile, the “Festo Handling and Positioning Profile (FHPP)”, which is especially tailored to handling and positioning applications.

With the FHPP data profile, Festo motor controllers can be actuated using a fieldbus interface via standardised control and status bytes.

The following are defined, among others:

- Operating modes
- I/O data structure
- Parameter objects
- Sequence control

Fieldbus communication

Motor controllers CMMP-AS, for servo motors

Accessories

Technical data	
General information	
Parameterisation	Using SafetyTool, integrated into the FCT plugin for CMMP-AS-...
Digital safe inputs DIN 40A/B to DIN 43A/B	
Specification	IEC 61131-2, type 3
Number of 2-channel inputs	4
Nominal voltage [V DC]	24
Operating range [V]	-3 ... 30
Nominal current [mA]	15
Max. nominal current [mA]	200
Properties	Suitable for emergency-stop switchgear, protective door circuit, light curtain, enabling button, two-hand operator unit; Inputs switching equivalently/antivalently; Test pulses can be configured; Function can be configured
Digital safe inputs DIN 44 to DIN 49	
Specification	IEC 61131-2, type 3
Number of 1-channel inputs	6
Nominal voltage [V DC]	24
Operating range [V DC]	-3 ... 30
Nominal current [mA]	15
Max. nominal current [mA]	200
Properties	Suitable for start button, brake feedback, mode selector, error acknowledgement, restart blocking; Test pulses can be configured; Function can be configured
Digital safe outputs DOUT 40A/B to 42A/B	
Number of 2-channel outputs	3
Output	High-side switch with pull-down
Nominal voltage [V DC]	24
Operating range [V DC]	18 ... 30
Permissible output current [mA]	< 50
Properties	Semiconductor outputs: parameterisable PNP (positive switching) Outputs switching equivalently/antivalently Test pulses can be configured Function can be configured
Monitoring contact C1, C2	
Nominal voltage [V DC]	24
Max. voltage [V DC]	< 30 (overvoltage-resistant up to 60 V)
Nominal current [mA]	< 200 (not short-circuit proof)
Version	Potential-free signal contact
Properties	Suitable for diagnosing safety functions Function can be configured

Motor controllers CMMP-AS, for servo motors

Accessories

Supported position encoders

- Resolver via X2A
- SIN/COS incremental encoder
- SICK Hiperface shaft encoder (only process data channel)
- Heidenhain ENDAT encoder
- Incremental encoder with digital A/B signals
- BISS position sensors for linear motors
- Incremental encoder with digital A/B signals

The manufacturers of SIL-certified shaft encoders publish guidelines for their use in safety applications.

The safety module CAMC-G-S3 takes the following manufacturer specifications into account when evaluating the encoder signals:

- Implementation Manual HIPERFACE® Safety dated 21.12.2010 (8014120/2010-12-21) → www.sick.com
- Specification of the E/E/PES safety requirements for EnDat-Master dated 19.10.2009 (D533095-04-G-01) → www.heidenhain.de (in preparation)

Permissible combinations of position encoders

First encoder	Second encoder	Achievable safety level		Note
Resolver	Other encoder	SIL 3	Cat. 3/PL d; Cat. 3/PL e	–
Resolver	Incremental encoder	SIL 3	Cat. 4/PL e	–
Resolver	None	SIL 2	Cat. 3/PL d	Please see the note below
SIN/COS incremental encoder	None	SIL 3	Cat. 3/PL d	Requires SIL classification of the encoder
SIN/COS incremental encoder	Incremental encoder	SIL 3	Cat. 4/PL e	Please see the note below
Hiperface incremental encoder	Incremental encoder	SIL 3	Cat. 3/PL e	Please see the note below
Hiperface incremental encoder	None	SIL 2 or 3	Cat. 3/PL d; Cat. 4/PL e	Requires SIL classification of the encoder
ENDAT encoder	Incremental encoder	SIL 3	Cat. 4/PL e	Encoder setting: "Other encoder" Please see the note below
ENDAT encoder	None	SIL 2	Cat. 3/PL d	In preparation. Requires SIL classification of the encoder
Other encoder	Incremental encoder	SIL 2	Cat. 3/PL d	–

Note

- Please assess whether your selected position encoder is sufficiently accurate to fulfil the monitoring task, in particular the SOS safety function.
- In applications with only one shaft encoder/position encoder, it must have the SIL classification required in accordance with the risk evaluation. In most cases, the classification requires additional requirements or fault exclusions in the mechanical system. Please check carefully that these requirements are fulfilled in your application and that the appropriate fault exclusions can be performed.
- In applications with only one shaft encoder/position encoder with analogue signal interface (resolver, SIN-/COS, Hiperface etc.), the restrictions regarding diagnostic cover and limitations as to the accuracy of standstill and speed monitoring that can be achieved must be taken into account.
- When using two functional encoders without SIL classification, the suitability of the encoder combination for use in safe systems up to SIL3 must be proven separately (for example, the following are required: diversity of the encoder systems with regard to CCF, MTTFd, etc., suitability of the encoders for the operating and ambient conditions, EMC, etc.).

Ordering data – Plug-in card

Description	Part No.	Type
 <p>Safety module:</p> <ul style="list-style-type: none"> • One of the plug-in cards CAMC-G-S1, CAMC-G-S3 or CAMC-DS-M1 must be inserted in slot 7 (→ Page 11) in order to operate the motor controller. • The plug connectors are included in the scope of delivery. To reorder plug connector NEKM → Page 20 	★ 1501331	CAMC-G-S3

Festo core product range

- ★ Ready for dispatch from the Festo factory in 24 hours
- ☆ Ready for dispatch in 5 days maximum from stock

Motor controllers CMMP-AS, for servo motors

Accessories

Interface CAMC-D-8E8A

Only for motor controller:
CMMP-AS-...-M3

The interface is used to extend the digital I/Os.

Up to two interfaces are supported simultaneously.

Technical data		
General information		
Max. connection cross section	[mm ²]	0.5
Electrical connection		Screw terminal
		Straight plug
Digital inputs		
Number		8
Nominal voltage	[V DC]	24
Voltage range	[V]	-30 ... +30 (protected against reverse polarity and short circuit proof)
Nominal value for True	[V]	8
Nominal value for False	[V]	2
Input impedance	[kΩ]	4.7
Digital outputs		
Number		8
Nominal voltage	[V DC]	24
Voltage range	[V]	+18 ... +30 (protected against reverse polarity and short circuit, protection in the event of thermal overload)
Output current	[mA]	100
Short circuit, overcurrent protection	[mA]	500
